

The industrial solution for manufacturers in the food industry

*easy*food

Companies from the food industry have been relying on CASYMIR for a long time. The special options made available to this sector by the ERP system have been combined to easyFood.

The introduction of the EU regulations EU 178/2002, EU 1642/2003, EU 575/2006, EU 202/2008, EU 596/2009 and IFS, BRC, requiring full traceability of food supplies, is a strong argument in favour of CASYMIR and its exceptional capabilities in the administration of batches. EasyFood is the Industrial system which facilitates daily business in the food sector.

Experience is our competence **casymir.com**

CASYMIR

With our long industry experience, we have developed CASYFOOD, an ERP software that is tailored to the requirements of companies in the food industry. CASYFOOD offers a transparent representation of the entire process chain in all operational areas and is consequently batch-oriented. Certifications according to GxP, GAMP V, IFRA, REACH, VOC, FDA and other national regulations are possible and have been already implemented by our customers.

Goods traceability guaranteed

easyfood

HIGHLIGHTS

- Nutritional database and nutritional value calculation (with GDA, RDA, attendances, cooking loss, etc.)
- Risk classification (HACCP)
- Reliable and flexible labeling and declaration of product content
- Ingredient management (for nutritional values, allergens, trace elements, vitamins, etc.)
- Detection of allergens

RELEVANT FUNCTIONS

- Validatable system
- Traceability of all data and processes
- Recipe management
- Flexible creation and management of certificates
- Ingredients, properties, areas of application of articles
- Acquisition and management of measurement data
- Easy management and documentation of free goods
- Flexible control of production facilities
- Ingredient management
- Support for order and stock production
- Calculation of product properties
- Integrated LIMS functions
- Stability database for product stability monitoring
- Secure product related warehouse management
- Maintenance of production facilities
- Multilevel production and release procedures
- Deposit of specifications
- Continuous traceability in all relevant areas
- Consistent workflow management
- Country- and customer-specific labeling with barcode GS1-128 (EAN)
- Batch traceability and quality management
- Customs Interface for Import and Export (CH)
- Complaints management
- Depiction of by-products
- Integrated weighing system
- Revision and release security
- Integration of document management systems
- Consignment stock and foreign production
- Audit Trail
